LabLynx

Your Ideal LIMS

Healthcare and Clinical Diagnostics

SOLUTION OVERVIEW

Designed specifically for the healthcare and clinical diagnostic industries, LabLynx's Healthcare Solution is a complete laboratory product suite that combines a physician portal, patient portal, ELN and an industry-specific versioning of our ELab LIMS that features a LIMS/LIS hybrid.

Our Healthcare Product Suite comes with ELab LIMS standard offerings with additional, unique features to speed up your testing and reporting processes including: sample pooling, custom report builder, contact management, event alerts, EHR/EMR integrations, batch report verification, single & batch sample management and the ability to visually assign samples to plate wells.

WHY CHOOSE US

- ☑ Flexible
- ☑ Scalable
- ☑ Expandable
- ☑ Secure
- ☑ Cloud Hosted
- ☑ 24/7 Live Support

LIMS/LIS Hybrid

Our solution offers a unique blend of sample focused and patient focused workflows to provide you a hybrid LIMS/LIS experience.

Physician Portal

Simplify test requisition and results report sending with our physician portal that interfaces directly with the LIMS.

Patient Portal

Using our secure, HIPAA compliant portal, patients can schedule lab work easily and view their reports as soon as they are ready.

LabLynx Features and Benefits

EHR/EMR Integration

Our Diagnostics Solution Suite can integrate with most EHR/EMR platforms, delivering streamlined data sharing and operational efficiency.

Single & Batch Sample Management

You no longer have to work around one workflow or the other, for LabLynx ELab allows you to run and manage both within the same system.

Contact Management

Manage patient, physician and staff records in a secure, HIPAA compliant system.

Sample Pooling

LabLynx fully supports sample pooling, maintaining all related data accurately so individual patients may be followed-up with in the event of a positive result.

Document Hosting & Management

SOPs, training manuals, certificates, regulatory files, receipts, manage your lab's vital operations documents within your LIMS for easy access.

High/Low/In Range

Results are identified relative to appropriate ranges, and additional steps can be taken if needed.

Reference Lab Interfaces

Send test requisitions to your reference laboratories of choice and bidirectionally share data and results with the lab through the LIMS.

Easily Manage High Throughput

Using our bulk receiving and bulk reporting tools, our reliable solution can help you manage high throughput with ease.

Instrument Integrations

Our system can automate data entry from your lab equipment as ELab LIMS integrates with most laboratory instruments.

Maintain Regulatory Compliance

Our Diagnostic Solutions Suite has built-in features to support you in maintaining compliance with CLIA, HIPAA, 21 CFR PART 11, ISO 17025 and more!

"LabLynx has had a tremendous impact on our laboratory. We implemented its COVID-19 solution in September of 2020, and the system immediately improved our throughput and turnaround time. Our testing partners have found the portal system to be easy to navigate. Highly recommended!"
